UCare grants promote health equity in communities across the state

Focus on opioid management, social conditions, dental access, behavioral health and primary care

MINNEAPOLIS, Mar. 5, 2019 — UCare has awarded grants totaling more than $1.5 million for health improvement initiatives benefitting underserved populations across the state. In line with the nonprofit health plan’s mission to improve the health of members through innovative services and partnerships across communities, UCare made contributions to organizations advancing health equity for diverse communities in greater Minnesota.

“The 2019 grants leverage the expertise of community partners to extend our health and wellness mission deep into Minnesota communities,” said Ghita Worcester, Senior Vice President of Public Affairs and Chief Marketing Officer. “It means a great deal to us to be able to improve social conditions and access to care for Minnesotans, especially those living in rural communities where health disparities prevail.”

Examples of UCare-sponsored programs in different regions of the state

Northern Minnesota
Chronic Opioid Management Program at CentraCare Health and detoxification programming in Wright County aims to decrease potential adverse events for patients through best practices for responsible opioid prescribing and to fund detoxification and withdrawal management services for Medical Assistance UCare members living in Wright County.

About UCare

UCare is an independent, nonprofit health plan providing health care and administrative services to more than 420,000 members throughout Minnesota and parts of western Wisconsin. UCare partners with health care providers, counties, and community organizations to create and deliver Medicare, Medicaid and Individual & Family health plans.

The health plan addresses health care disparities and care access issues through a broad array of community initiatives. UCare has received Top Workplaces honors from the Star Tribune for nine consecutive years since the rankings began in 2010.
