Basic health plan definitions

Copayment: A fixed amount (for example, \$20) you pay at the time you receive health care services. Copayments don't apply toward your deductible, but they do apply to your out-of-pocket limit.

Coinsurance: Your share of the costs after you've met your deductible. It's shown as a percentage.

Deductible: The amount you have to pay for covered services before your plan begins to pay. The deductible does not apply to all services.

In-network provider: Doctors, hospitals, clinics and pharmacies that have a contract with UCare to provide services to you.

Non-network provider: Doctors, hospitals, clinics and pharmacies that do not have a contract with UCare to provide services to you. You will usually pay more to see a non-network provider.

Out-of-pocket limit: The most you'll pay during the year before your plan pays 100% of the cost for covered services. There is no out-of-pocket limit for out-of-network care.

When you receive medical services, you'll receive an Explanation of Benefits (EOB) that will include how much you've paid toward your deductible and out-of-pocket limit. A print copy will be mailed to you, and you can also find this information by logging in to your member account on ucare.org.
